LIVE PRODUCT

L1 → L15 · next-band comparison

Most wealth tools return a balance.

WealthCopy returns a next-band report.

01 Locate

Automatic L1–L15 band
from household net worth

02 Compare

Eight asset groups against
the next-band reference

03 Prioritize

Safety → three adjustments
→ a 12-month route

No product picks. No progress theater. One connected report.

8-GROUP INPUT

1

자산 구성

2

부채·연금흐름

3

상황 확인

STEP 01

만원

억원

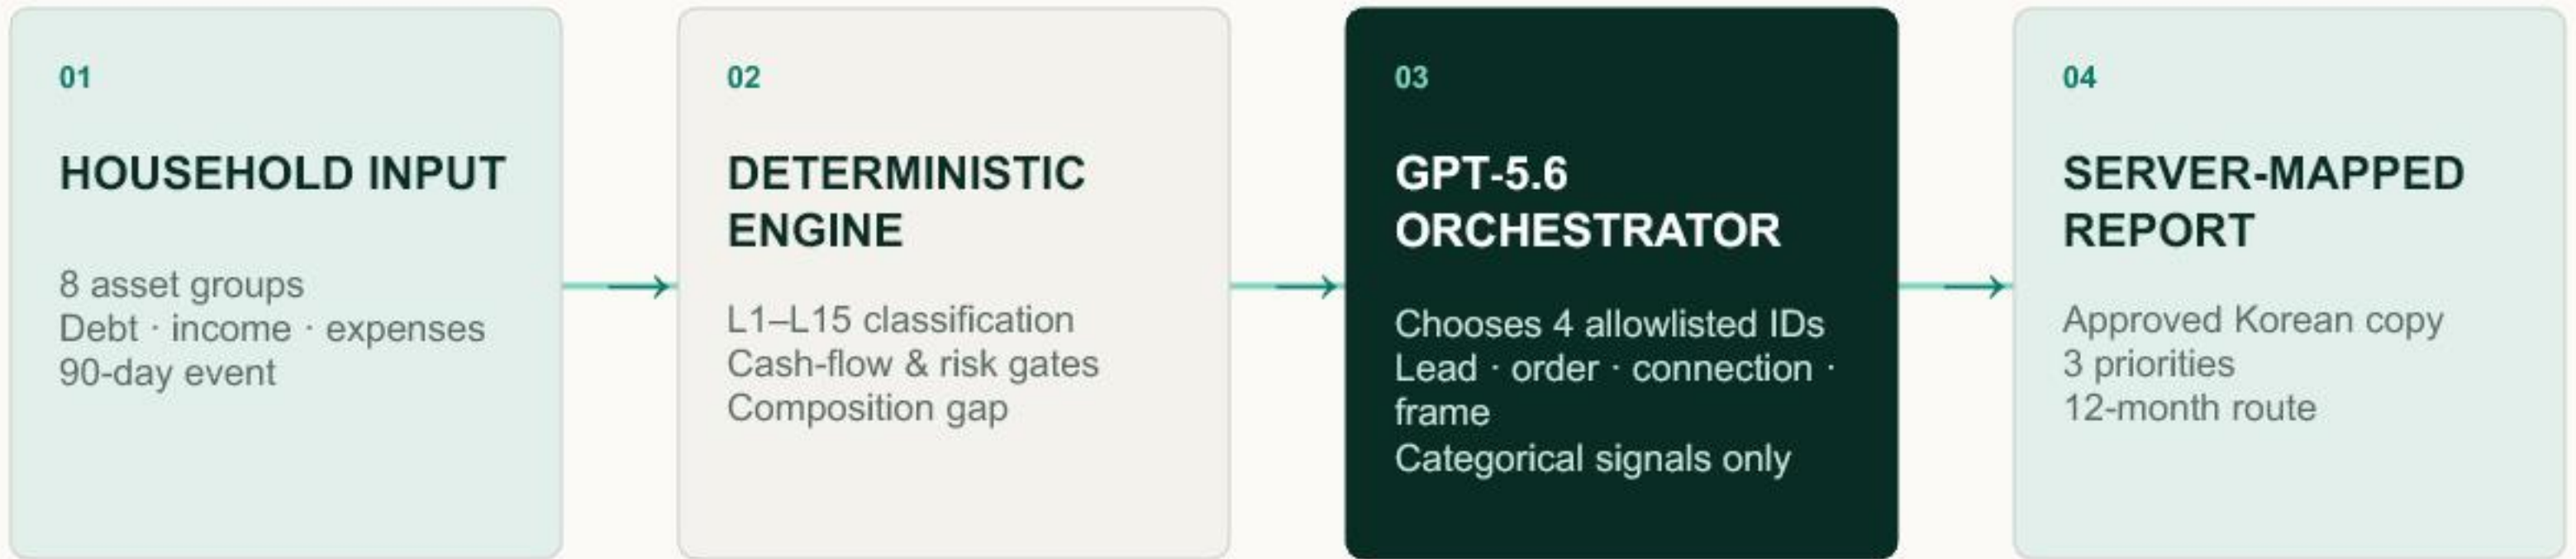

우리 가구의 자산을 구성별로 나눠 주세요.

인과 배우자의 공동·개별 명의 자산을 모두 포함해 주세요. 모든 금액은 오늘 또는 같은 최근 월말을 평가기준일로 맞추고, 중복 없이 가장 가까운 항목 하나 넣어 주세요. 보유하지 않은 항목은 0으로 확인해 주세요.

01 현금성·단기예치 현금, 예·적금, CMA, MMF	0.3 억 3,000만원	02 거주용 자산 앞저주 주택, 임대보증금	2.8 억 2억 8,000만원
03 상장 금융자산 주식, 채권, ETF, 공모펀드, 상장 REIT	0.7 억 7,000만원	04 연금·장기계정 연금저축, IRP, 퇴직연금	0.25 억 2,500만원

Deterministic financial truth. GPT-5.6 explanation orchestration.

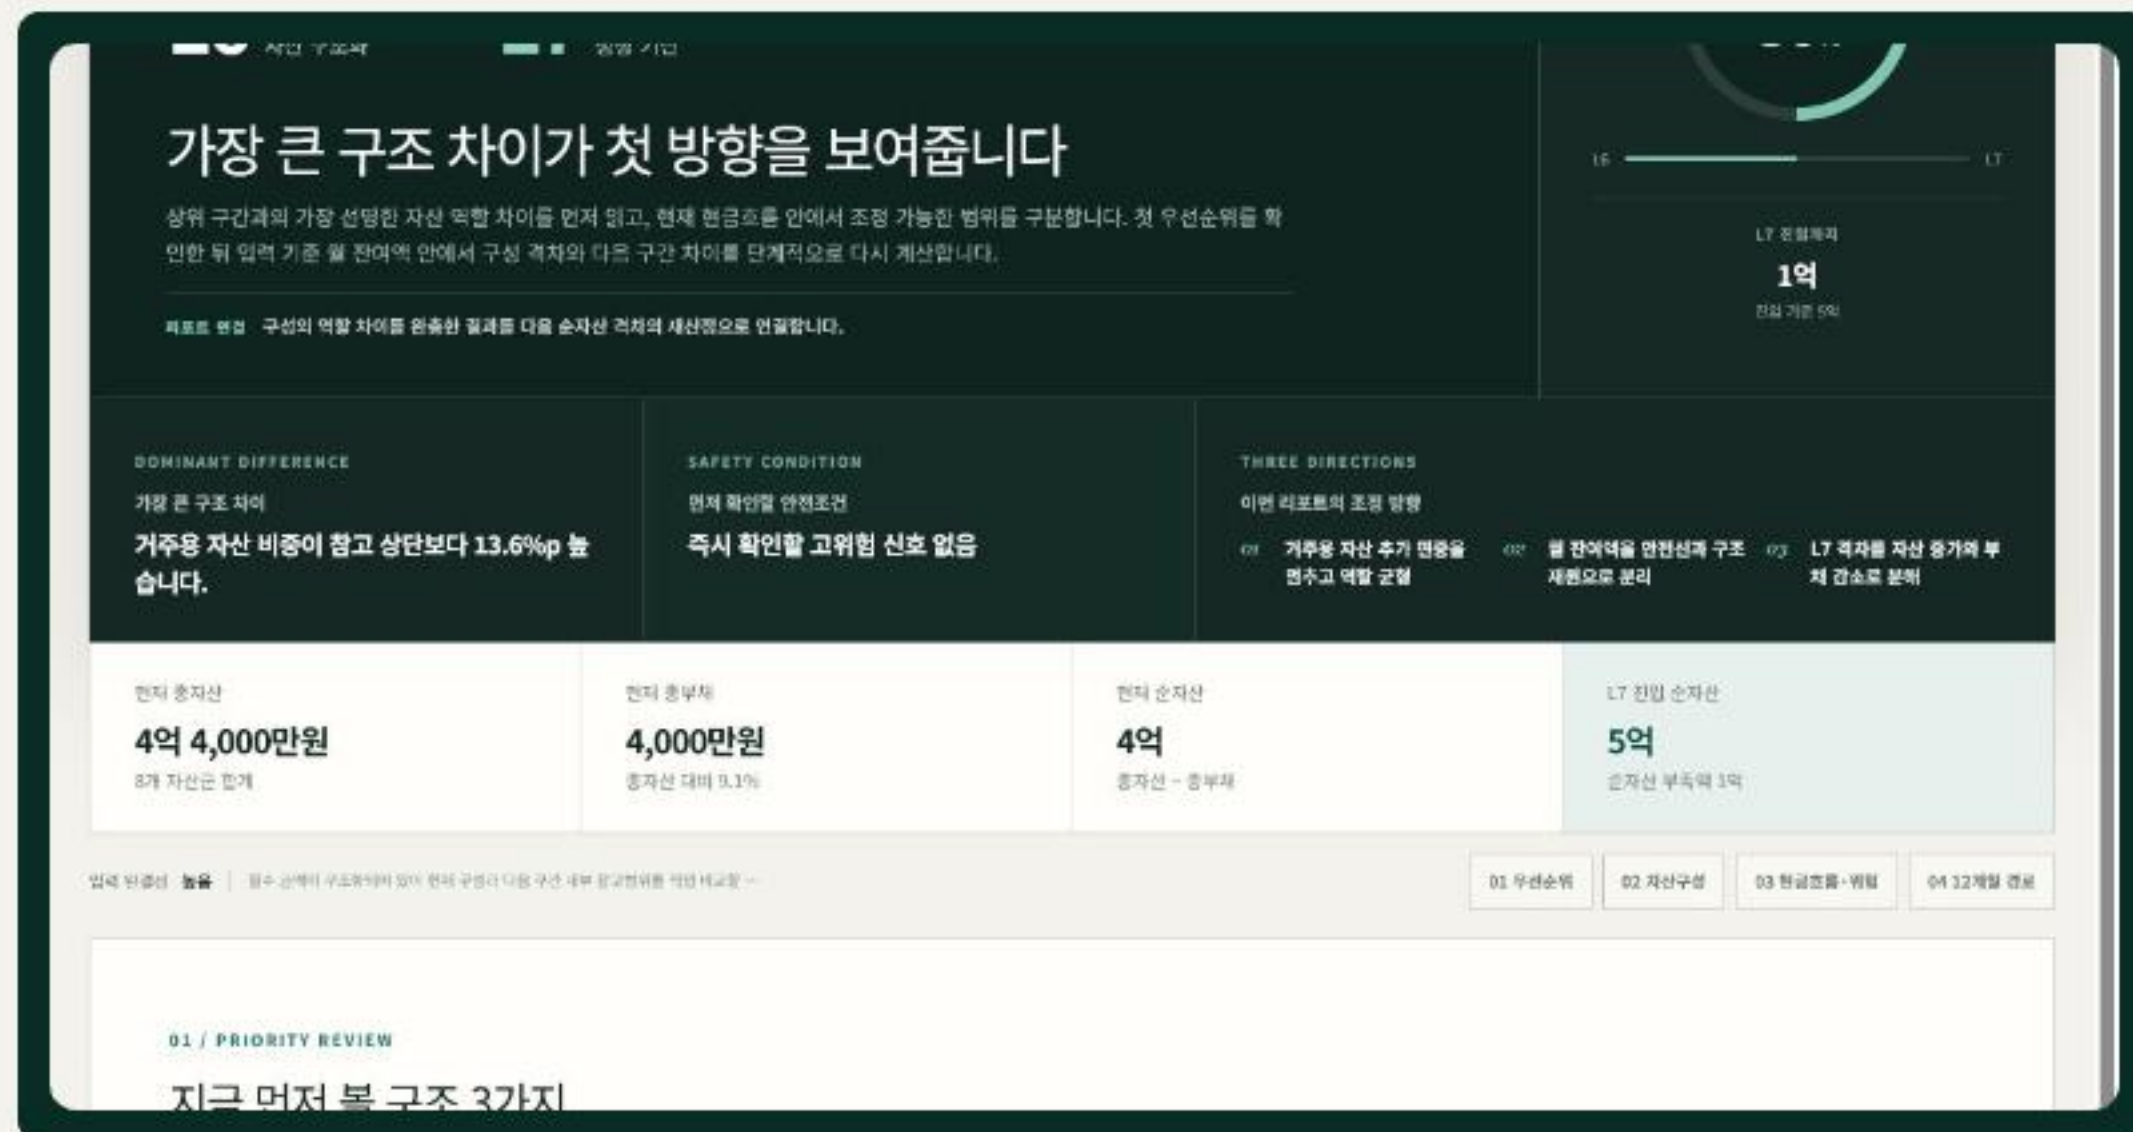

The model never owns amounts, levels, safety rules, or free-form financial advice.

FAIL CLOSED

Invalid, missing, or context-unsafe model output returns the deterministic report.

A KRW 400M household sees more than a KRW 100M gap.

L6 → L7

50%

through the current band

KRW 100M

remaining to L7

+13.6pp

primary residence vs. the next-band reference ceiling

Sample input: KRW 440M assets – KRW 40M debt = KRW 400M net worth. Internal diagnostic ranges, not market forecasts.

Financial claims stay bounded, private, and testable.

SAFETY FIRST

A monthly deficit changes the route.

Liquidity and debt conditions come first.

PRIVACY BOUNDARY

Exact amounts, ratios, levels, and notes never reach GPT-5.6.

- No financial input in localStorage
- Session-only before/after comparison
- Invalid model output → deterministic fallback

asset groups

Strict wealth-report-v2 · live Cloud Run smoke verified

L15 IS TERMINAL

**No fictional L16.
The report shifts to governance.**

Make the next wealth structure clear.

Open the product, run the L6 sample, then edit one variable to watch the report reconnect.
